EXPERIENCE

Hanwha Convergence

ROC Operator - Anaheim, CA

July 2023 - November 2023

- Monitored solar facility operations, ensuring safety compliance and electric system procedures.
- Addressed and reported faults, alarms, and anomalies promptly to the Operations Manager.
- Produced power plant performance reports (Daily, Weekly, Monthly) following established procedures.
- Maintained accurate shift event documentation.

Volt Workforce Solutions

Convention Worker - Anaheim, CA

November 2019 - November 2019

- Efficiently managed crowd control during game demos.
- Accurately estimated labor requirements and ensured sufficient resources were available to support anticipated workload.
- Quickly resolved any issues that arose to maintain productivity goals and ensure a smooth experience for attendees.

Academic Resource Center, Loyola Marymount University

Front Desk Receptionist - Los Angeles, CA

June 2017 - July 2017

- Answered and documented phone calls and messages utilizing strong communication skills.
- Organized and compiled important conference key notes to ensure their accessibility and accuracy.
- Spearheaded an initiative to revamp the website's user interface, resulting in a more user-friendly and efficient design.
- Implemented effective filing systems to maintain and organize files and records.

PROJECTS

Work Order Generation and Distribution System

Backend Developer

September 2023

- Spearheaded the design and development of a scalable work order system with a callable API, aimed at enabling seamless integration into existing ticketing systems.
- Future plans include implementing an efficient order processing system, real-time updates, and user authentication for enhanced security.
- Project in the early development stage, with an ongoing focus on achieving the above objectives.

FabFlix

Full Stack Developer

June 2022

- Created a scalable and testable Spring Boot back-end for storing and retrieving movie information from a SQL database, utilizing effective testing strategies to ensure software quality.
- Implemented user authentication and authorization functionality to ensure secure access to user data.
- Developed an intuitive and responsive front-end with React and React Native, while also contributing to the design and development of test automation and support for optimal user experience.

191-for-191

Backend Developer

June 2022

- Collaborated on cross-functional teams to develop a scalable Spring Boot backend for a project website.
- Optimized MySQL schema to securely store large amounts of data, showcasing proficiency in relational databases.
- Created a well-documented REST API to enable consumption of backend services, while tracking and resolving testing defects for continuous improvement.

EDUCATION

University of California, Irvine

Bachelor of Science in Computer Game Science

Irvine, CA

September 2018 - June 2022
